

DAWSON

A Native Hawaiian Organization Certified 8(a) Small Business

Providing Clients with Innovative, Cost-Effective Construction Solutions

DAWSON has over 20 years experience providing innovative, cost effective solutions to meet our clients' construction needs. As a Native Hawaiian Organization (NHO) certified 8(a) company, our commitment to "*Kupono Ka Hana*" – Excellence in Service – is integral to the exceptional quality of our performance on every project.

With a focus on Federal facilities and infrastructure, DAWSON brings demonstrated experience to understanding the constraints and challenges that facility owners face in maintaining existing assets, or constructing new facilities to support their evolving missions.

DAWSON's success reflects our multi-disciplinary team's proven expertise, in-place management systems, and demonstrated capabilities for solving our client's facilities and infrastructure needs.

Excellence in Service is the DAWSON difference and can be seen in the advantages we bring to our federal clients:

- Exempt from 8(a) sole source ceiling
- Licensed general contractor
- Licensed electrical contractor
- Self-performer of most trades
- Offices dispersed across the globe
- Design-build team in-place
- Cleared to work in secured facilities
- World-class safety record

Clients Served:

DAWSON provides construction services to military, DoD, and Federal agencies including:

- Department of Defense
- US Air Force
- Air Force Center for Engineering and Environment
- US Army
- US Army Corps of Engineers
- US Naval Facilities Engineering Command
- US Coast Guard
- Department of Homeland Security
- US Customs & Border Protection
- US Department of Energy

Proven Project Experience

Military Construction

LOCATION: Hawaii Army National Guard, Kalaeloa

CLIENT: USPFO – Hawaii Army National Guard

Construction of 29th Infantry Brigade Combat Team (IBCT) Readiness Center: DAWSON was construction manager for the new 56,000 square foot facility constructed as the first phase to house the 29th Brigade. The finished facility, which achieved LEED Silver status, includes an auditorium, assembly hall, administrative spaces, storage areas, locker rooms, IT rooms, bathrooms and classrooms. This facility will allow the Brigade to better prepare for their primary missions of supporting the United States in times of national security.

Design-Build and O&M Construction

LOCATION: Naval Station Jacksonville, Florida

CLIENT: Naval Facilities Engineering Command (NAVFAC) Southeast

8(a) IDIQ Construction Contract, Design Build and 100% Plans/Specs: Under a \$4.2M SATOC, DAWSON manages and performs facilities-related and public works-related construction, repair, and maintenance. We provide minor construction, alteration, repair, and renovation as well as short term maintenance requirements. DAWSON is responsible for project management, planning, labor, transportation, estimating, materials, equipment, tools, and incidental design.

Facility Renovations

LOCATION: Thule AB, Greenland

CLIENT: AFWET, Air Force Wideband Enterprise Terminals

Site Prep: DAWSON is currently executing a four-year secure Design-Build (D-B) effort for site preparation for a new communications facility. This effort involves modifications to the existing communications facility, as well as the installation of new infrastructure to support additional modernized equipment. Work includes the construction of a new foundation for the new generation terminal. An additional utilidor will also be constructed to connect the new facility to the existing infrastructure. Various electrical, COMM, IDS, and life-safety improvements will be provided as part of the effort.

Secure Facilities

LOCATION: Lackland AFB, Texas

CLIENT: Air Force Information, Surveillance, Reconnaissance Agency (AFISRA)

Facility Upgrades for AFISRA: Under multiple contracts, DAWSON performed renovations to the AFISRA secured facility situated on Security Hill at Lackland AFB. Work included abatement, interior finishes, electrical upgrades, fire suppression system upgrades, and installation of energy conservation devices.

Construction Management

LOCATION: Kingsville, Texas

CLIENT: USACE Fort Worth District

CM of Border Patrol Processing Facility: DAWSON provided construction management services on behalf of confidential client at this \$30M+ new construction project. Work included quality control management, safety oversight, cost and schedule control, and project administration.
